

Early Obstetrics Sonography Report

Diagnostic Procedure:

- Procedure Type: Early Obstetrics Sonography

Relevant Dates:

- Last Menstrual Period (LMP): November 15, 2024
- Estimated Due Date (EDD): August 22, 2025
- Gestational Age at Ultrasound: 7 weeks

Findings:

1. **Gravid Uterus Characteristics:**
 - The gravid uterus shows a smooth-walled gestational sac.
2. **Fetal Pole and Cardiac Activity:**
 - A fetal pole is visible.
 - Fetal cardiac activity is appreciated.
3. **Decidual Reaction:**
 - Good decidual reaction is noted, indicating normal uterine lining response to pregnancy.
4. **Crown-Rump Length (CRL):**
 - Measured at 3 mm, consistent with a gestational age of approximately 5 weeks and 6 days.
5. **Additional Observations:**
 - A tiny blood collection is seen just above the internal os, measuring 5.9 x 2.8 mm.
 - The cervix measures 4 cm in length.
6. **Exclusion of Adenexal Pathology:**
 - No adenexal pathology detected.
7. **Absence of Free Fluid:**
 - No free fluid is observed in the pouch of Douglas.

Additional Comments:

- There was a noted delay in conception.

Follow-up Examination Date:

- UI/GDD scheduled for August 30, 2025
