

**Name:**

**Date:** 03 Jan 2025

**Sex/Age:** Female/22 Yrs

**Ref. By:**

**Examination:** Gravid Uterus Sonography

**LMP:** 15 Nov 2024

**Gestational Age (GA):** 7 weeks, Estimated Delivery Date (EDD) 22 Aug 2025

**Findings:** - The gravid uterus shows a smooth-walled gestational sac. - A fetal pole is observed with cardiac activity appreciated. - Decidual reaction appears good; CRL measures 3 mm (corresponding to approximately 5 weeks and 6 days of gestation). - A tiny blood collection is noted just above the internal os, measuring 5.9 x 2.8 mm. - Cervix length measures 4 cm. - No adnexal pathology or free fluid observed in the pouch of Douglas.

**Comments:** - Early intrauterine pregnancy detected with an age estimation of about 5 weeks and 6 days. - Noted delayed conception with a UI-GDD (Ultrasound Gestational Dating) of 30 August 2025.
